

To Whom It May Concern:

As a citizen of this country, I believe that media cross-ownership will only stifle independent and objective news reporting in favour of sensational, one-sided corporate influenced news stories. I fear that any news damaging to those media corporations or their subsidiaries will be silenced and the American public kept ignorant of possibly harmful situations and events, events that may threaten our rights and liberties. The relaxation of media regulation is even more troubling when those companies are foreign-owned and operated.

Please to do not alter the current laws and regulations because these laws are already too lax and media reporting too sensationalized.

Thank you for your time.

Best regards,

Jason Jones
